University of Roehampton London

ASSESSMENT BRIEF

Coursework 2

Programme	BSc Computing		
Module Title	Data Science		
Module Code	CMP-N205-0		
Module Level	6	**Assessment Type(s)**	Report
Word Length / Duration	1000 words	**% contribution to module mark**	30%
Deadline (date & time) for Submission	1st May 2026 (Friday)	**Format/Location of submission**	Moodle
Assessment Feedback date:	15th May 2026 (Friday)		

Learning Outcomes

This assessment has been designed to provide you with an opportunity to demonstrate your achievement of the learning outcomes listed below.

By successfully completing this assessment, you will be able to

- Collecting and Assessing Quality of Data that will be used.
- Use and apply appropriate models for analysis.
- Derive insights from the analysis results.
- Investigate and discuss potential issues on the business-related challenges.
- Compare and contrast different uses of Machine Learning concepts.

Employability and Professional Skills

This assessment has been designed to provide you with an opportunity to demonstrate your achievement of the following skill(s) which is(are) critical in professional context and jobs.

By successfully completing this assessment, you will be able to

- Collecting and Assessing Quality of Data that will be used.
- Use and apply appropriate models for analysis.
- Derive insights from the analysis results.
- Investigate and discuss potential issues on the business-related challenges.

	• Compare and contrast different uses of Machine Learning concepts.

Assessment Requirements

As a continuation of Coursework 1, you will complete the following submission requirementsfor your Coursework 2.

Task List and Submission Requirements

You must ***do your implementation using python***. Appropriate usage of Data frame and

libraries that you have learnt during the tutorials should reflect in your development e.g., Numpy, Scipy, Pandas, Scikit-learn, matplotlib etc. Please note, you may not need to use allof them for your coursework.

Marking Criteria

1. Presentation - how well organised is the report. (Submitted Report based) (15%)
2. Discussion - overall level of discussion in the report. (Submitted Report and Demonstration based) (20%)
3. Execution - How smoothly does the Codes Execute- any error there? (Submitted Report and Demonstration based) (20%)
4. Code Quality and Commenting - structures of codes used during the implementation. (Submitted Report and Demonstration based) (20%)
5. Quality of Information and/or, supporting Files - ability to provide details or supporting documents to support the report. (Submitted Report based) (20%)
6. Report Submission - ability to provide a submission that meets the requirements given. (Submitted Report based) (5%)

Assessment Success Guidance

1. Your submission must be a single report (.pdf) and should contains,
2. Supporting Files
    a) Interactive python file
    b) Dataset Excel file

Assessment Guidance Support and Formative Feedback

All the following sections must be covered submitted within the due date in order to be considered for a complete submission for this part.

3. Your submission must be a single report (.pdf) and should contains,
    a) Cover page
    b) Table of Content
    c) A brief summary of how you processed/pre-processed Dataset for servingyour purpose/goal.
    d) Description of the Implementation of the model that you have done using your chosen technique of method from coursework 1 (You don't copy the code in this section but just provide the screenshots of your important codeblocks with proper title(s).
    e) Reflection on your work and establish your argument (You can provide a good connection between what you proposed in Coursework 1 and how you have achieved those goal in Coursework 2. You may also describe how you can deploy your model(s) in practice.)

4. Supporting File
    a) Interactive python file

    The supporting file you submit with your report should be an interactive python file (**.ipynb** format), contains codes you implemented with proper titles (in text blocks) and comments (in code blocks) and the file name should be "your name" with ipynb extension, like **"your name.ipynb".**

    If you are unable to upload the "your name.ipynb" file directly through your submissionbox, you can alternatively, upload a "zipped" or, "rar" folder that contains your .ipynbfile in it.

    b) Dataset Excel file

    You submit your ***final dataset*** (the one that you have pre-processed and used in your implementation as a excel (.csv) file.

Additional Information (if required):

Assessment Criteria (Grade Boundaries or Rubric):

Criteria	Excellent	Satisfactory	Not Satisfactory	Not Attempted
Presentation howwell organised is the report. *(Submitted Reportbased)* **(15%)**	Good organisation, points are logically ordered,report order flows together.	Organised, although some points are somewhat jumpy. General flow of report works.	Some organisation points jump around. Flow is unclear.	Poorly organised. Nological progression. Overall flow is vague.
Discussion overall level of discussion in the report. *(Submitted Report and Demonstration based)* **(20%)**	Excellent overalllevel of discussion provided.	Good discussion level provided although unclear or inconsistent in a couple of places.	Discussion is good but lacks clarity and consistency in places.	Discussion is poor and doesnot provide clarity to the report.
Execution How smoothly does the Codes Execute- any error there? *(Submitted Report and Demonstration based)* **(20%)**	All the sectionsof the codes executed correctly	Most of the sections of the codes executed correctly	Some of the sections of the codes executed somewhat correctly but no output is provided.	No codes provided or, erroneous codes provided.
Code Quality and Commenting structures of codesused during the implementation. *(Submitted Report and Demonstration based)* **(20%)**	Code Quality is appropriate and commented properly	Code Quality Needs work and commenting is missing in some places	Code solutions do not cover the entirety of the problem definition and/or, not commented appropriately	No codes provided or, code providedis very poorly formatted andno comment provided
Quality of Information and/or, supporting Files ability to provide details or supporting documents to support the report.*(Submitted Report based)* **(20%)**	The supplied ipynb file contains all of the code and textblocks to appropriately implement and explain the solutions to the tasks	The ipynb file contains all of the coding solutions for the tasks but some text blocks are missing/explanation provided are not sufficient	The ipynb file does not have all of the coding solutions for the tasks and some/all text blocks are missing/explanation provided are not sufficient	An ipynb file was submittedbut it did not open/did not have any code and/or text blocks or no ipynb file was submitted
Report Submissionability to provide a submission that meets the requirements given. *(Submitted Report based)* **(5%)**	Correct files submitted onlywith no issues	Correct files submitted only but some issues with files provided	Correct files submitted but with unwanted files and possibly issues in files provided	Incorrect/no files were submitted.

Contact for Queries/ who you can contact for further information or queries

Should you have any question, please do not hesitate to contact Dr Michael Ng at michael.ng@roehampton.ac.uk or Dr Yusuf Izmirlioglu at Yusuf.Izmirlioglu@roehampton.ac.uk

Ethical Requirements

Academic Misconduct:

"Academic integrity and honesty are fundamental to the academic work you produce at the University of Roehampton. You are expected to complete coursework which is your own and which is referenced appropriately. The university has in place measures to detect academic dishonesty in all its forms. If you are found to be cheating or attempting to gain an unfair advantage over other students in any way, this is considered academic misconduct, and you will be penalised accordingly."

Further details about "Student Code of Conduct" and "Disciplinary Regulations" can be found at:

https://www.roehampton.ac.uk/corporate-information/policies/

Use of Artificial Intelligence (AI)

The assessment is designed so that the use of AI during the assessment is irrelevant or impossible. You are welcome to use AI to support learning and preparation for this assessment. Please make sure you read and understand the assessment guidelines and ask your Module Leader if you have any questions. You can find the guidance on the use of AI here*.

https://roehamptonprod.sharepoint.com/sites/portal/information/LTEU/Documents/4b%20Student%20Guidelines%20on%20the%20use%20of%20AI_.docx

**You can find the student guidance on the use of AI in the Library and Nest.*

Referencing

All required references are available on Moodle.

Mitigating circumstances/late penalties

Sometimes circumstances outside of your control may affect your studies and might prevent you from submitting work on time or attending an exam.

The University offers the ability for students to request additional time to complete an assessment or to defer an examination to a later date. If you are finding yourself in such a situation, please speak to your Academic Guidance Tutor, the

Roehampton Student Union (RSU) or someone in the **Wellbeing team** first, who can support you. Further details can be found on the mitigating circumstances portal. If you do not apply for or are not approved for Mitigating Circumstances, late penalties will apply. If work is submitted up to 14 days late, the mark will be capped at 50%; if it is over 14 days late, it will not be marked.
Resubmissions and Reassessment If you are required to resubmit this assessment or take part in reassessment, you will be notified via Moodle and your student email. Please ensure you check both regularly. Any reassessment tasks will follow the same learning outcomes and criteria.
Submission Checklist Before you submit, ask yourself: Have I fully answered the assessment brief? Have I met the word count and formatting requirements? Is my referencing complete and accurate? Have I declared any AI use honestly? Have I proofread my work? Am I submitting through the correct platform before the deadline?
